

Monarch® Clean Air,

More than just an air purifier

MONARCH® CLEAN AIR - Approved by the Federal Government in the fight against Covid-19

MONARCH® CLEAN AIR IS THE WORLD'S BEST AIR PURIFIER!
Several tests have proved this!

- ✓ Disturbing odors and harmful gases are purified by the Monarch E-Gas Zero filter for 0.0006 mg/m³ (PM), The World's Best odor filter
- ✓ Bacteria, aerosols, pollen are particles up to 0.3 microns, DO NOT penetrate the lungs when inhaled and are purified from the air by 99.971% by Monarch E-Dust Zero filter. All HEPA air purification, ventilation, air conditioning, etc. purify these particles, but the best HEPA filters are our own nose and throat hairs, which is why external HEPA filters have little or no use for the health of humans and animals.
- ✓ Viruses, allergens and mold spores, particles of 0.1 microns, are inhaled directly into our lungs and are the cause of all these health problems. Monarch E-Perfect filter eliminates these particles for 99.9999%, which also purifies all surfaces and, much more importantly, our lungs, resulting in an improvement of our immune system and a "strong improvement to complete healing" of various health complaints.
- ✓ Monarch Clean Air is an active air purifier that not only purifies the air sent through the filter (passive air purifiers) but also purifies and disinfects the air and the surfaces, including the ventilation ducts (LOG Reduction 3). Once again a major saving for many companies
- ✓ Monarch uses a cyclonic effect that saturates the filters while maintaining efficiency, unlike linear air purifiers that clog up to 75% in one week.
- ✓ An ion generator that promotes oxygen absorption into the blood with air vitamins is essential
- ✓ 2 Far-UVC lights that match the healthy effect of the sun
- ✓ Radiation, toxic and ozone safe according to official German TÜV reports

THE WORLD HEALTH ORGANIZATION (WHO) CALLS THIS PHENOMENON THE 'SICK BUILDING SYNDROME'.

Sick Building Syndrome (SBS) describes a medical condition in which people in a building experience symptoms of illness or feel unwell for no apparent reason. The symptoms become more severe the longer people stay in the building and disappear when leaving the building and are therefore completely related to the air pollution in the building. Sick Building Syndrome leads to significant disruption in people's work performance and personal relationships and to a significant loss of productivity."

"SBS can occur in any building: offices, apartment buildings, daycare centers and schools. It causes reduced work performance and increased absenteeism, resulting in a total cost of up to 0.5-1.0% of GDP." (Excerpt from 'Sick Building Syndrome', a report published by WHO, Regional Office for Europe)

Mold spores and mold increase due to excessive insulation and higher humidity, making people sick. Although medical assistance can be provided, the effect of such treatment is temporary. Despite different ventilation systems and average air purification systems, there is an increase in illness symptoms and absenteeism among employees.

There is good news! A breakthrough has been achieved with a high-tech, highly efficient and financially advantageous system that uses a technique that prevents and solves indoor air pollution-related problems. Monarch® Clean Air has made a difference and brought a solution to people suffering from the effects of indoor air pollution.

SPECIFICATIONS

- Power: 5 levels including sleep mode, turbo mode and AUTO mode
- Eco-friendly & energy efficient consumption of 13W - 68W
- Acceptable noise levels: 22 dBA (normal operation) to 56.3 dBA (extreme pollution)
- Plug & play: Easy to use in a wall bracket or as a free-standing device
- Detection and display of particles and gases
- 1 Clean Air air purifier purifies the indoor environment for 15 to 20 employees
- Regulates moisture and CO², regardless of the number of m³
- Safe from ozone, radiation and toxic substances
- Height: 52 cm - 62 cm
- Diameter: 35 cm
- Weight: 9 kg
- Amply complies with the new legislation on Indoor Air Quality

IMPORTANT BENEFITS

- Enjoy virus- and allergen-free air with healthy humidity
- Enjoy a healthy and pleasant indoor climate
- Automatically disinfects air and surfaces
- All 'Sick Building Syndrome' symptoms disappear within 24 hours
- Ensures less disease transmission and absenteeism due to illness among employees
- Generates high energy savings and assists building maintenance
- Lifetime warranty without maintenance costs, only the filters need to be replaced
- Monarch® is a one-time investment that continuously gives you excellent ROI or 'Return on Investment'
- Monarch® is used everywhere in homes, in schools, government buildings, from kindergartens to elderly homes, from catering to fitness, and even hospitals!

Monarch® Clean Air

ADDITIONAL ADVANTAGES FOR COMPANIES

- Ensures meetings can be held in the office and decreases the need for work from home
- Reduces fatigue among employees and improves concentration
- Gradually reduces the afternoon slump making it a thing of the past
- Automatically cleans and disinfects ventilation channels
- Lessens the oppressive heat of the summer
- Pure air helps improve the mood of employees and makes them happier, assists in better collaborative work
- Hardly or no dust in the air
- Extends equipment life and reduces maintenance costs
- Has a built-in heating system too

The World Health Organization calculated the value of these benefits at €3,600 per employee per year.

Temporary promotion: You can test your Monarch Clean Air device(s) for free for one week, with official lab air measurements before and after the test set-up. Contact us and we'll send you and email with your free quote and the applicable conditions.

We have 26 years of experience with FDA certified and ULPA air technology. Our vision and mission is to promote the health of you and your family, your employees and your customers. We also help organizations and institutions ensure that everyone in their care is protected from indoor air pollution.

Our team is always ready to serve you!

Monarch® Clean Air is a "Total Indoor Environment Purification System" that ensures air is purified and your health is secure from illnesses.

Namely:

360° Cyclonic Action + Perfect Hepa Filters +
UVC Lamps + Ion Generator + Log Reduction 3 Together
they make Monarch® Clean Air unique and
unparalleled.

Are you searching for air purification that makes your
indoor environment healthy and safe?

We have one perfect solution and two models you can
choose from.

Our package includes an Air Hygiene Certificate too.

Monarch® Clean Air device:

SW €1830.95*/ LB €1880.95*

Rent or lease a device from €70*/ month

No maintenance costs

Filters only: €19.66*/ month

Service by domicile

*Prices ex. VAT and subject to change
